PROFILE

ENSTAB engineering student focused on multi-agent AI, RAG, computer vision, and geospatial analysis. AI Engineer Intern at Talan Tunisia, contributing to an urban-planning platform from analysis workflows to 3D views.

EXPERIENCE

Talan Tunisia | AI Engineer Intern, SummerCamp

1 Jul - 31 Aug 2026 | UrbanMind (Khatatli UrbanTwin)

- Co-developed **UrbanMind**, an AI-assisted urban-planning tool using public geospatial data, cited regulations, and 2D/3D design.
- Built analysis dashboards and 3D building-footprint views, connecting Python scoring and geospatial outputs to React.
- Connected existing-city analysis to the 3D twin across backend endpoints and frontend onboarding. [Project repository](#).

SELECTED PROJECTS

Sytern (Stagi) | AI internship simulator | 2nd place, TBS Atlas Hackathon

- Built a four-agent internship simulator with Kanban tasks, messaging, voice calls, and behavioral feedback.
- Used n8n for routing, escalation, and evaluation; React, Supabase, and ElevenLabs for the product experience.

GROOV | multi-agent AI study group

- Created a six-persona AI study room with adaptive teaching modes and local Ollama models.
- Grounded answers in uploaded PDFs with FAISS and Sentence Transformers; added page citations and Edge TTS voices.

AgenticHire | AI recruitment platform | 3rd place, NerdData ENSI Hackathon

- Co-developed a 12-agent hiring platform for job matching, CV analysis, and recruiter workflows.
- Built FastAPI and React workflows with Mistral AI orchestration and role-aware routing.

Vendex | AI image forensics | top 6 of 37 teams, GDGC FST Hackathon

- Built an image-forensics pipeline using ELA, FFT, DINOv2, MobileSAM, and EXIF analysis.
- Added an explainable multi-agent verdict, parallel FastAPI inference, and automated PDF reports.

EDUCATION

ENSTAB | Engineering Degree in Advanced Technologies

Specialization: Digitalisation & Data Analysis | Sep 2024 - Present

Faculty of Sciences of Tunis | Preparatory Cycle in Mathematics & Physics; engineering entrance exam (2024)

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C++, C, Java

AI and data: PyTorch, Hugging Face, Ollama, Mistral AI, RAG, FAISS, computer vision, geospatial analysis

Development: FastAPI, React, React Three Fiber, Supabase, n8n, REST APIs, Git

Languages spoken: Arabic (native), French (fluent), English (fluent)

LEADERSHIP AND CERTIFICATIONS

ACM ENSTAB Club Chair (Sep 2025 - Present): lead club operations, programming training, and contests. Member of ElectroniX and IEEE ENSTAB.

NVIDIA: Fundamentals of Deep Learning (2025) | **365 Data Science:** Mathematics (2024)
